

THE NORTHWEST GARDENER, INC.

LANDSCAPE AND IRRIGATION INSTALL/MAINTENANCE/NURSERY

Annual Lawn Care Service Program

Wouldn't you like to take the worry out of maintaining your lawn? The Northwest Gardener, Inc. offers a year long, hassle-free maintenance program that will keep your lawn green and healthy.

Wouldn't you also like to spend your lawn care dollars locally, and not line the pockets of some faceless corporation? The Northwest Gardener, Inc. is owned and operated by the Lundstrom Family of Snohomish.

Moss Control - January

Your lawn will be treated with moss control and fertilizer. The combination will turn your lawn a luscious green, and knock down the pesky moss, that we all know so well.

Calcium Carbonate (a form of lime) - February

Soils in western Washington are often deficient in calcium. This treatment not only adds calcium to the soil, but also helps to balance the PH.

Early Spring fertilizer and weed control - March

Prepare your lawn for spring and get ahead of unsightly dandelions, and other lawn weeds.

Aeration & Calcium Carbonate Round Two - April

Aeration is perhaps the nicest thing you can do for your lawn. Another boost of Calcium, and another dose of weed control if necessary.

Spring fertilizer - May

Your lawns natural spring growth is waning...give it a boost.

Another little boost - Late June

A light dose to keep your lawn green and growing & check for pesky lawn weeds.

Fall fertilizer - September

Repair damage that a summer full of sun and activity has caused.

Late Fall fertilizer - November

Promotes root growth for next year's healthy lawn.

Call or e-mail to establish your program. Feel free to ask about our organic lawn care.
